Artist overcomes speaking disability through beatboxing

Beatboxing is form of music that aims to replicate any instrument in any song using one's mouth and voice.

As a kid, Stevie Soul had a speaking disability and stuttering condition. When he tried to speak, "funny sounds -- instead of words -- would come out of his mouth." Stevie took these sounds and turned them into beats and patterns. Ultimately, this aided Stevie in forming sentences. Stevie has become a passionate, talented beatboxer that has performed in front of large audiences and produced music for national commercials. To learn more, [click here.](#)

Airport to Feature Multi-Sensory Room

Delta Airlines has partnered with Hartsfield-Jackson Atlanta International Airport and The Arc, an advocacy group for persons with intellectual and developmental disabilities, to create a multi-sensory room for customers on the autism spectrum. This room has interactive items, such as a ball pit and a bubbling water sculpture, to help calm and prepare children for air travel experience. To learn more, [click here.](#)

Upcoming Events

Special Needs Resource Fair

Thursday, May 19, 2016
4:00pm-6:30pm
Davie, FL

This resource fair is intended for families seeking out community providers and agencies that serve the special needs community. It is free and open to the public. To learn more about this event, and other services provided by Goodman Jewish Family Services of Broward, [click here.](#)

Family Care Council

From Spina Bifida to Sled Hockey Player

Chris Douglas grew up with spina bifida, a neurotubular birth defect that required spinal cord surgery when he was 11. Douglas can walk, but needs ankle foot orthotics for "adventurous" activities. He surfs, skates, and is a part of Hurricanes Sled Hockey Team in Rockledge, FL. Moreover, Douglas states he likes "to do everything to the extreme limit and continue to push the limits every day." To learn more, [click here](#).

UNF Adaptive Toy Project

With the help of an \$85,000 grant from the National Institute of Health (NIH), the University of North Florida will move forward with the development of a project in which students make toys for children with disabilities.

Engineering and physical therapy students will collaborate in an elective class to make battery-powered toy cars that uniquely fit each child's needs. To learn more, [click here](#).

A Housing Community for Persons with Disabilities

Debby and Terry Kays are hoping to develop a co-housing community in Naples, FL for persons with autism and their families through their non-profit organization, Adonis Autism. This community housing would be a "self-organized and a self-financed group of families that come together to develop a supportive community." Currently, six families are interested in this concept, but the organization aims to house 20 families. To learn more, [click here](#).

Netflix to Enhance Access for Blind Customers

Netflix has reached a settlement with the American Council for the Blind (ACB) to make movies and videos offered through Netflix video streaming and DVD rental

Florida (FCCF) Meeting
Saturday, May 21, 2016
8:30am-4:00pm,
Orlando, FL

The Family Care Councils (FCCs) are a group of governor appointed volunteers that advocate for persons with developmental disabilities and their families. Through the FCCF, representatives from each council meet quarterly to educate and discuss common issues and concerns. To learn more, [click here](#).

Special Olympics: Summer Games & Healthy Athletes Screening

The Special Olympics is hosting various screening events throughout the state, which include dental, vision, audiological, podiatric, and fitness screenings. These events all take place from 9:30am-2:30pm. To find more Special Olympics events, [click here](#).

Near the bottom of the newsletter, we listed upcoming screening events!

subscriptions accessible. The settlement indicates Netflix will provide audio description for many popular titles in its streaming and disc rental libraries. It also states Netflix will make its website and mobile applications accessible to individuals who use screen-reading software to navigate websites and apps. To learn more, [click here](#).

Study: EMG May Guide Cerebral Palsy Treatment Options

A new study indicates that data from an electromyography (EMG), a tool that monitors muscle activity, can be evaluated to determine whether surgery is a good fit for a child with cerebral palsy. Children with cerebral palsy often undergo highly invasive surgeries to improve their movement, but only about 50% have significant improvement in their movement after these surgeries.
